

Magnetic Snap Directions

Make sure you have some stabilizer on the back of the fabric that the magnet is being attached to.

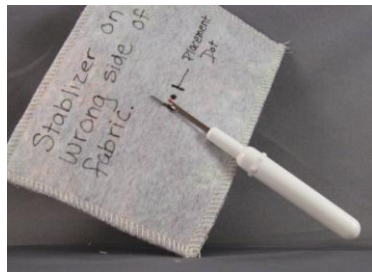

- On the **wrong side** of the fabric mark a placement dot where you want the snap.

- Place the center hole of one of the washers over the dot.

- With a pencil, mark the fabric through the 2 rectangle openings on the washer.
- With a seam ripper or sharp scissors slice open the 2 rectangle lines $\frac{1}{4}$ ".

- From the **right side** of the fabric, insert the prongs from one piece of the snap through the opening you just cut.

- Add another small piece of stabilizer (if desired) through the prongs and then place the washer on.

- Press the prongs to the outside and flat against the fabric

- Mark a dot where you want to attach the 2nd half of the snap, using the already inserted snap as a guide.
- Repeat the same process for the 2nd half of the snap.
